

CHIROPRACTIC & the nervous system

Subluxation occurs when a **misalignment** and **fixation** within the spine creates stress and tension on the nerves. This stress causes the Central Nervous System to go into a protective state of **fight** or **flight**.

BREAK PEDAL

PARASYMPATHETIC | WELLNESS CYCLE

Chiropractic adjustment **corrects** subluxation

Rest, relaxation, digestion and Immune function **Improve**

Growth, healing and development are **restored**

GAS PEDAL

SYMPATHETIC | DIS-EASE CYCLE

Misalignment and **fixation** occur (subluxation)

Stress response (adrenal glands) activated

Central Nervous System gets stuck in **fight** or **flight**
